# Flat 90° Elbow with Cover

The product identified with code T00830515, described as Flat 90° Elbow with Cover 50X 150, falls within the category of cable tray components. It is designed with a safety profile and a self-locking snap-on cover, and is designed to create a 90° bend, ensuring optimal adaptation to flat routes.All flat elements have an internal radius of 100mm identical to the external radius, thus increasing the usable space and allowing the channels to be placed side by side. It is made of Sendzimir galvanised steel with a thickness of 1.0 mm and a thickness of 0.8 mm for the cover and is also available in hot-dip galvanised, painted and stainless steel finishes. This product is an efficient and practical solution that combines quality, functionality and ease of installation.
