

45° flat elbow with Cover

The product with code T00870515, called 45° flat elbow without Cover 50x150 Flat Bend, belongs to the category of cable tray components.

It is designed with a safety profile and self-locking snap-on cover to create 45° bends, ensuring optimal adaptation to flat routes. All flat components have an internal radius of 100 mm, identical to the external radius, increasing the usable space and allowing the ducts to be placed side by side. The product is made of Sendzimir galvanised steel with a thickness of 1.0 mm (body) and 0.8 mm (cover), and is also available in hot-dip galvanised, painted and stainless steel finishes. This solution combines quality, functionality and ease of installation, offering an efficient and practical option for cable management.
